## SMT1200D

1200nm High Performance Infrared TOP LED

### **Outline and Internal Circuit**

(Unit: mm)

### **Features**

• Chip Material : InGaAsP

• Chip Dimension: 350um \* 350um

• Number of Chips : 1pce

Peak Wavelength : 1200nm typ.Lead Frame Die : Silver Plated

Package Resin : PA6T

• Lens : Silicone or Epoxy Resin

### **Application**

## **Absolute Maximum Ratings (Tc=25°C)**

Item	Symbol	Ratings	Unit
Power Dissipation	PD	140	mW
Forward Current	lF	100	mA
Pulse Forward Current	IFP	1000	mA
Reverse Voltage	VR	5	V
Thermal Resistance	Rthja	80	K/W
Junction Temperature	Tj	120	°C
Operating Temperature	Topr	-40 ~ +100	°C
Storage Temperature	Tstg	-40 ~ +100	°C
Soldering Temperature	TSOL	250	°C

<sup>‡</sup>Pulse Forward Current condition : Duty 1% and Pulse Width=10us.

### Optical and Electrical Characteristics (Tc=25°C)

(\*: 100% testing, \*\*: reference value)

Parameter	Symbol	Min	Тур	Max	Unit	Test Condition
Forward Voltage	VF		1.1	1.4	V	IF=50mA*
	VFP		2.2			IFP=1A**
Reverse Current	IR			10	uA	VR=5V*
Total Radiated Power	РО	4.8	7.2		mW	IF=50mA*
			46			IFP=1A**
Radiant Intensity	IE		2.4		mW/sr	IF=50mA**
			15			IFP=1A**
Peak Wavelength	λр	1170		1230	nm	IF=50mA*
Half Width	Δλ		80		nm	IF=50mA**
Viewing Half Angle	θ1/2		±61		deg.	IF=50mA**
Rise Time	tr		60		ns	IF=50mA**
Fall Time	tf		30		ns	IF=50mA**

<sup>‡</sup> Radiated Power is measured by G8370-85.

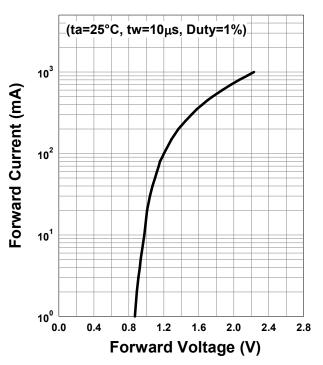

<sup>‡</sup>Soldering condition : Soldering condition must be completed with 5 seconds at 250°C.

<sup>‡</sup> Radiant Intensity is measured by ANDO Optical Multi Meter AQ2140 & AQ2743.

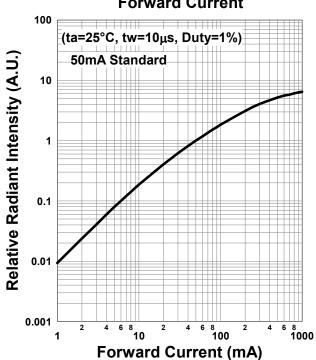

### **Typical Characteristic Curves**

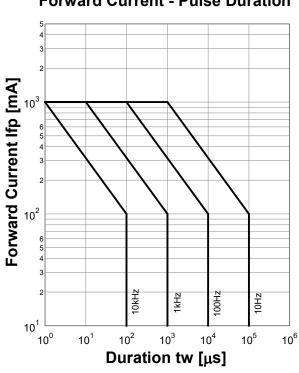

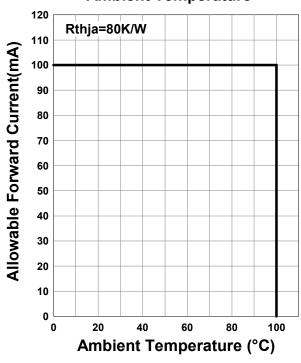

# Relative Radiant Intensity - Forward Current

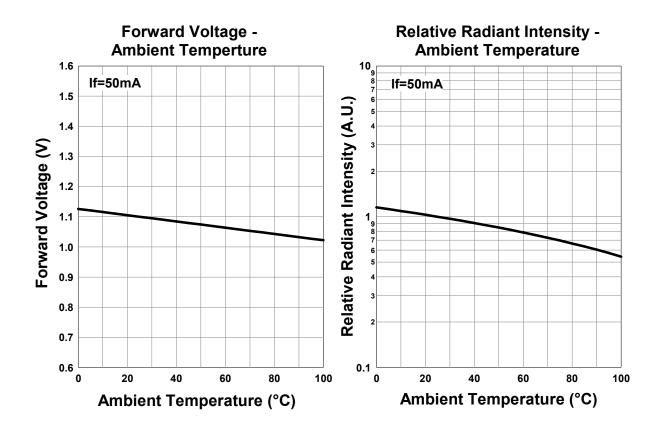

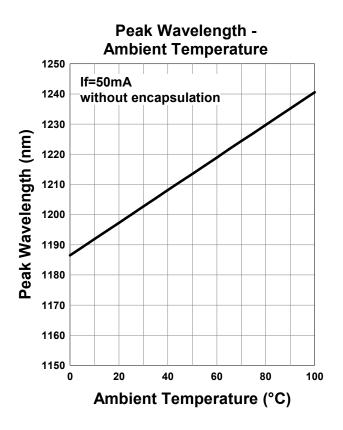

**Forward Current - Pulse Duration** 

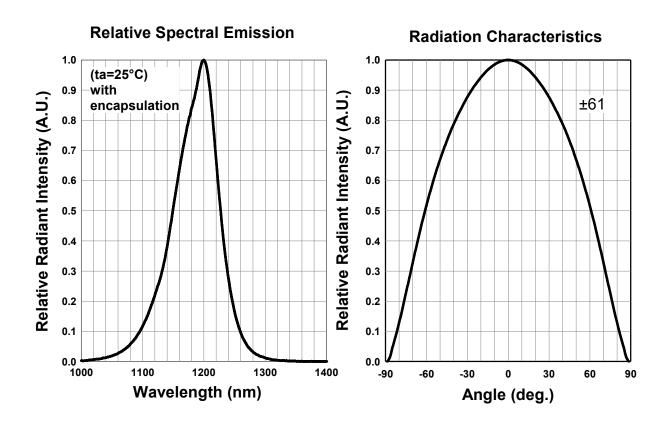

Allowable Forward Current Ambient Temperature

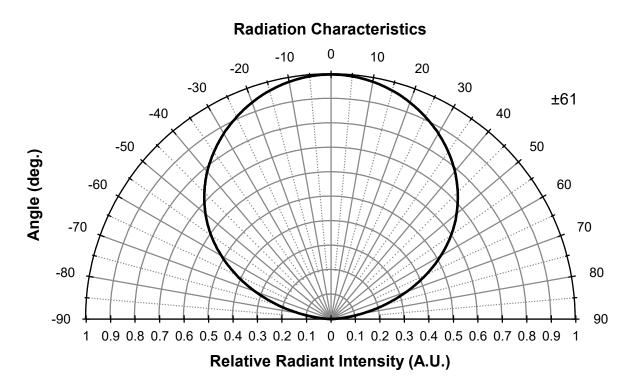

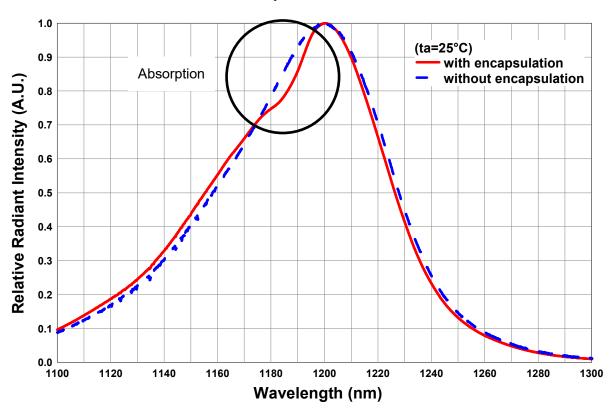

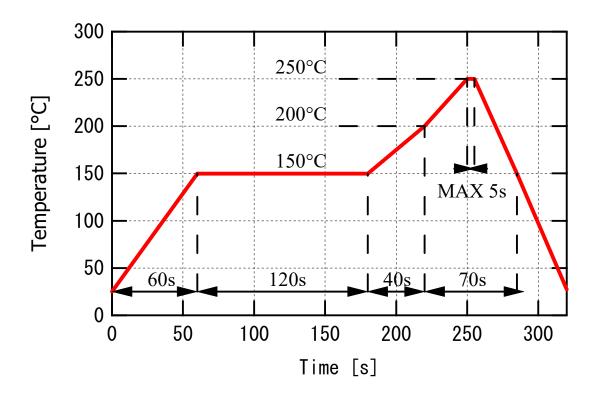

\*The absorption of lens resin changes spectral emission.

### **Relative Spectral Emission**

## **Recommended Reflow Soldering Profile**

### Wrapping

Moisture barrier bag aluminum laminated film with a desiccant to keep out the moisture absorption during the transportation and storage.

# SMD LED storage and handling precautions Storage Conditions before Opening a Moisture-Barrier Aluminum Bag

- Before opening a moisture-barrier aluminum bag, please store it at <30°C, <60%RH.</li>
- Please note that the maximum shelf life is 12 months under these conditions.

### Storage Conditions after Opening a Moisture-Barrier Aluminum Bag

- After opening a moisture-barrier aluminum bag, store the aluminum bag and silica gel in a desiccator.
- After opening the bag, please solder the LEDs within 72 hours in a room with 5 30°C, <50%RH.</li>
- Please put any unused, remaining LEDs and silica gel back in the same aluminum bag and then vacuum-seal the bag.
- It is recommended to keep the re-sealed bag in a desiccator at <30%RH.
- The 72-hour- long floor life does not include the time while LEDs are stored in the moisture-barrier aluminum bag. However, we strongly recommend to solder the LEDs as soon as possible after opening the aluminum bag.

### Notes about Re-sealing a Moisture-Barrier Aluminum Bag

When vacuum-sealing an opened aluminum bag, if you find the moisture-indicator of the silica gel
has changed to pink from blue (indicating a relative humidity of 30 % or more), please do not use
the unused LEDs, the aluminum bag, or the silica gel.

### Notes about Opening a Re-sealed Moisture-Barrier Aluminum Bag

 When opening a vacuumed and re-sealed aluminum bag in order to use the remaining LEDs stored in the bag, if you find that the moisture-indicator of the silica has changed to pink, please do not use the LEDs.

### **Disclaimer**

Product specifications and data shown in this product catalog are subject to change without notice for the purposes of improving product performance, reliability, design, or otherwise.

Product data and parameters in this catalog are typical values based on reasonably up-to-date measurements. Product data and parameters may vary by user application and over time.

Products shown in this catalog are intended to be used for general electronic equipment. Products are not guaranteed for applications where product malfunction or failure may cause personal injury or death, including but not limited to life-supporting / saving devices, medical devices, safety devices, airplanes, aerospace equipment, automobiles, traffic control systems, and nuclear reactor control systems.
