# 1st Quarter FY2013 Financial Results 

## USHIO INC.

## Jul. 31, 2013

This report contains forward-looking statements, including earnings forecasts, which are based on information currently available to the Company and on certain assumptions deemed to be reasonable. Please be advised that actual results may differ substantially from those forward-looking statements due to various factors.

* All figures in the material have been rounded down to the nearest billion yen unless otherwise noted.

## I. Financial Results for 1Q FY2013 II. Forecasts for FY2013 III. Supplementary Information

## Highlights of Financial Results for 1Q FY2013

For the first quarter, consolidated net sales decreased by $1.5 \%$ YoY to $¥ 35.4$ billion, and consolidated operating income increased by $19.6 \%$ YoY to $¥ 2.2$ billion.

## > Market Trend as a Background Factor

## Electronics Market :

In the markets for flat-panel displays (FPD), semiconductors and electronic components, user facilities show a modest recovery trend in capacity utilization rates. There are indications that manufacturers in Japan extensively invest in equipment for small- to medium- sized LCD panels, followed by capital expenditures in China in this fiscal year. As for the electronic component market, capital expenditure remain at a low level.

Visual Imaging Market :
The center of gravity of sales has been shifted to emerging countries as the penetration of Digital Cinema Projectors (DCPs) in developed countries has grown considerably. The general imaging equipment field for non-cinema has been growing continuously.

## Key Points of Business Conditions by Segment

Equipment Business :
Sales of imaging equipment decreased YoY due to less sales of DCPs. However, it rose QoQ due to the yen's depreciation and firm sales of general imaging equipment. Sales of optical equipments decreased both YoY and QoQ, reflecting the partial curtailment of expected capital expenditure in the electronic component market, concentration of shipments in and after the 2 Q for the FPD market as well as seasonal factors.

## Light Sources Business :

Sales of xenon lamps for cinema projectors has grown continuously and saw the best sales record on quarter basis. Sales of UV lamps for lithography held firm because of a modest recovery trend in capacity utilization rates for user facilities. Overall sales of halogen lamps rose both YoY and QoQ as lamps for the office automation (OA) field kept a high market share and acted as a driving force behind the halogen lamp business.

The consolidation of the EUV light source business in Japan decreased R\&D expenses both YoY and QoQ.
There is no change to the first-half and full-year consolidated earnings forecasts.

## Future Prospects

## >Equipment Business

## Imaging Equipment Field:

USHIO expects a gradual decline in sales volume of DCPs due to the considerable degree of penetration in developed countries. Since the center of gravity of sales are shifting from developed countries to emerging countries, we will actively bring "Solaria" series to the market to maintain the market share, which will lead to stable sales of xenon lamps. In the meantime, the general imaging market for non-cinema has shown a steady expansion, and is expected to grow continuously.

## Optical Equipment Field :

We predict that optical equipment for LCD panels, such as photo-alignment equipment, will be extensively shipped in and after the 2 Q . Although business inquiries for equipment relating to electronics components have been increasing, we expect that extensive customer investments will be postponed until next fiscal year.

## >Light Sources Business

## Discharge Lamps:

Replacement demand for UV lamps for lithography is projected to remain firm owing to a modest recovery trend in capacity utilization rates for facilities in the FPD, semiconductor and electronic component markets. As for xenon lamps for cinema projectors, we predict that its sales continue to grow steadily leveraging the high reliability of the products and demand expansion stimulated by an increase of the total number of DCPs installed in the market. Other lamp sales, such as for data projectors, are also projected to remain stable.

## Halogen Lamps :

In the OA field, halogen lamps are expected to remain firm maintaining a high market share although there is a concern about the negative impact of the European economic stagnation.
