

# About Ushio

Since its founding, Ushio has been leveraging light as not only illumination but also as energy in order to create new markets for light. Today, Ushio is drawing on the potential of light to contribute to society in the three business fields of Industrial Processes, Visual Imaging, and Life Sciences.

## Industrial Processes

### Comfort and Convenience

Ushio's technologies are being leveraged in such areas as the manufacturing process of semiconductors and flat panel displays (FPDs). To create products that meet global needs, we will use light to support technological innovation in manufacturing with the aim of realizing more comfortable and convenient lifestyles for people.

## Visual Imaging

### Excitement and Sharing

Ushio's light technologies are actively being put to use in various settings in the entertainment industry, including digital cinema, virtual reality, projection mapping at amusement parks, and stage lighting and production. To realize more fulfilling and abundant lifestyles for people, we will continue to leverage these technologies to deliver extraordinary experiences that inspire audiences and communicate to them the feelings of artists and creators.

## Life Sciences

### Safety and Reassurance

Ushio is promoting technological innovation through the utilization and application of light in such fields as environmental hygiene, medical care, agriculture, security, climate change countermeasures, and space exploration. By doing so, we will strive to realize a sustainable society that offers safety and peace of mind.
