

DXL

Series

FOR NEC DIGITAL CINEMAS

The DXL series have been newly developed as ideal light sources for digital cinema.

The DXL series, offering high stability and high reliability, are used as light sources for NEC digital cinema projectors. These high-luminance light sources of DXL series are optimum for digital projectors that use micro mirror technology devices.

Such outstanding performances of the DXL lamps have been approved by NEC and they have been officially classified as "recommendation" by NEC.
